

FUTURING Workshop with invited experts held in Lyon on the 1st of December 2016

The workshop was organized by CEA and TECNALIA, with the support of LMS. The team has identified and invited a panel of 18 experts and stakeholders from all across Europe who were selected on the basis of the background and experience in fields related to Circular Economy. The objectives of the workshop were to help identifying and validating the Building Blocks (BB) and Pillar Actions (PA) and approximate a common understanding of the Circular Economy canvas that could be used in the next tasks in the project. Furthermore, the Lyon's workshop has been a great occasion to gather a great amount of cutting-edge information about Circular Economy (like projects or contacts) that can be directly used in other tasks and WPs in the project, as well as to disseminate the project to experts. The participating experts and FUTURING partners all agreed that it was a very productive workshop with benefits and knowledge gained for both sides.
