

FUTURING Workshop with invited experts held in The Hague on the 10th of October 2017

The workshop was organized by TNO, with the support of LMS and took place at TNO's facilities in Anna van Buurenplein 1, The Hague, The Netherlands (TNO's headquarter). The theme of the workshop was *"FUTURING – Implementation of Circular Economy in Europe and developing a Vision for the European Industry"* and brought together stakeholders and experts from the technology and policy fields. The main objectives of the workshop were to acquire input and feedback on the:

- enablers and barriers regarding the implementation of Circular Economy in Europe,
- strategies for large-scale industrial investments in Europe within the framework of Circular Economy,
- best practice cases and a methodological framework for studying and ranking relevant cases and
- priorities for achieving EU re-industrialization.

The topics were discussed from the Social, Economical, Environmental sustainability and Regulatory framework and policy incentivisation aspects related to Circular Economy.

FUTURING project partners had the opportunity to collaborate in a round-table discussion with senior experts and exchange views regarding the above mentioned topics and individually provide a Vision Statement.

Experts and stakeholders at FUTURING "The Hague" Workshop.
